

Unit 13: The Story of Rain

A The story of rain is also called the **water cycle**. This is when water goes up to the sky and then comes back to land again. **Colour the picture.**

B Read the 3 words below. Match them to their meaning.

Evaporation

Tiny water vapour droplets in the air get cold. They join together into bigger droplets and make clouds.

Condensation

The sun heats the water in rivers, lakes or the sea. The water turns into tiny droplets called water vapour or steam.

Precipitation

The droplets of water get too big and heavy and fall to earth as rain, hail, sleet or snow.

C Draw a picture for each word.

1. Evaporation

2. Condensation

3. Precipitation
