

## MAKE A MUSICAL INSTRUMENT

Can you make a musical instrument at home, such as a guitar, drum or a shaker?

Lots of items in your house can be recycled to create a musical instrument. Empty food tins can be used to create drums. Wrap elastic strings around a cardboard cereal box to create a guitar. Or fill a clean plastic milk carton with rice and decorate it to create a shaker. The possibilities are endless.

● **Going further:** Once you have made various instruments, can you compose a piece of music with them? You could even write lyrics.
