### *SESE - Science*

The recent rocket launch in America has had us thinking lots about space and the other planets. We thought it would be nice for you to learn more about space, the rocket ship and the life of an astronaut (including what they eat and drink and how they go to the toilet in space!). We have included a planet fact hunt, a cross word and a thinking activity - if you could only bring 10 items to space with you, what would they be?

There are some fascinating videos on Youtube that you could watch to learn more, including what it is like inside the International Space Station (ISS) and even an astronaut doing some science experiments on board!

We are so proud of all your work so far, you are all amazing! This is our second last week of work, lets make the most of it. Don't forget to post your work on Seesaw - it might even get published on the class blog where your friends can see it and comment on it ☺

We are looking forward to hearing from you all very soon.
